

Teacher Overall Rating Calculation Worksheet (Alaska Standards)

Also available for Danielson & Marzano Frameworks

<http://education.alaska.gov/TeacherCertification/eeval.html>

Purpose: This worksheet represents a suggested method for the calculation of the overall rating for a teacher. The overall rating will be reported to the Department of Education & Early Development beginning July, 2016 for the 2015-2016 School Year.

Directions: The overall rating is determined by a weighted combination of the professional performance standards rating points and the student learning data rating points.

Step 1: To calculate the **rating points for the professional performance standards**, complete the following steps:

- 1) Assign a numeric value to each of the performance standards ratings (Exemplary = 4, Proficient = 3, Basic = 2, Unsatisfactory = 1).
- 2) Find the total of all the ratings numeric values.
- 3) Calculate the % of the total possible by dividing the ratings total by total points possible (i.e. 7 standards x 4 = 28).
- 4) Multiply the % of the total possible points by the weight (for SY 2015-16 the weight is 80%).

Step 2: To calculate the **rating points for the student learning data**, complete the following steps:

- 1) Assign a numeric value to student learning data rating (Exemplary = 4, Proficient = 3, Basic = 2, Unsatisfactory = 1)
- 2) Calculate the % of the total possible by dividing the ratings total by 4 points possible.
- 3) Multiply the % of the total possible points by the weight (for SY 2015-16 the weight is 20%).

Step 3: To calculate the **overall total, find the sum of the professional performance standards and student learning data rating points.**

Step 4: Use the Overall Rating Determination Chart

Overall Rating Determination			
All Domains Proficient or Higher		Any Domain Basic or below	
If all individual domains are Proficient or Higher use the following chart to determine overall rating.		If one or more individual domain(s) is Basic or below, use the following chart to determine overall rating.	
Overall Total	Overall Rating	Overall Total	Overall Rating
> 80	Exemplary	>= 50	Basic
75 to 80	Proficient	< 50	Unsatisfactory

SAMPLE

If all of the individual standards including the student learning data are proficient or higher, use the left side of the Overall Rating Determination Chart to determine the **Overall Rating**.

If one or more of the individual standards including the student learning data is basic or below, use the right side of the Overall Rating Determination Chart to determine the **Overall Rating**.

Teacher Overall Rating Calculation Worksheet (Alaska Standards)

SY 2015-16 & 2016-17

Educator's Name _____

Professional Performance Standards

Professional Performance Standards	Two	Three	Four	Five	Six	Seven	Eight	Total	% of total possible points	Total Points Possible	Overall Rating Points
									Total/28		
Rating								0	0	X 80	0

Rating Values

Unsatisfactory = 1

Basic = 2

Proficient = 3

Exemplary = 4

Student Learning Data

		Total/4		
Rating		#####	X 20	#####
Overall Total				#####
